

CUSTOM CHART FOR FREEDIVING SUITS

MEASURING INSTRUCTIONS

Tapes can stretch over time, check periodically against a yardstick.

When taking measurements for a custom wetsuit, customer should be in a bathing suit. When taking measurements for a customer drysuit, customer should be in undergarments to be worn under the drysuit when diving. For circumference measurements, tape should be snug but not pulled tight. Make crotch measurements with a pen or ruler held at the customers highest point on the crotch. Record the customer's height, weight, and age is very important. A brief coment on the customers physical condition would be helpful. HIP measurement is widest part of hip at the crotch level.
